Requirements Gathering Document Today

A short paragraph that describes what this document is in terms of the assignment description, what your group did, and introduce the client. We can use this space to give the first page a little meat and a nice balance to the look of the document.

I. Client description of requirements

Here we can write paragraphs, a list, or an outline of what the client told us they wanted. Try to use complete sentences because we will rewrite them in the next section. If this section feels too short your group may have to add some things a non technical client would say they needed.

1. Client described situations where tools aren't there when needed.
- 2.
- 3.
- 4.
- 5.
- 6.
- 7.
- 8.
- 9.
1. Customers should be able to get tools on the internet or from Joe, the warehouse manager.
- 10.
- 11.
- 12.
- 13.
- 14.
- 15.
- 16.

- 17.
- 18.
- 19.
- 20.

Requirements rewritten to be Clear, Unambiguous, Consistent, Prioritized, Verifiable. Writing the requirements this way will help us understand the amount of work the requirement brings and more easily categorize them later. We can break a single requirement from the first section into multiple CUCPV requirements here

CUCPV Requirements

1. Client needs to be able to locate an individual tool through the application.
2. Customers need to be able to check quantity on hand of specific types of tools.
- 3.
- 4.
- 5.
- 6.
- 7.
- 8.
- 9.
10. Employees should be able to check out and check in tools by updating the customer's ledger / account.
11. Customers should be able to indicate their willingness to check out a tool the next time one becomes available.
12. Customers receive an email when their reservation can be satisfied.
- 13.
- 14.
- 15.
- 16.
- 17.
- 18.

- 9.
- 10.
- 11.
- 12.
- 13.
- 14.
- 15.
- 16.
- 17.
- 18.
- 19.

Conclusion: Write something to end you submission. A couple of lines about what your group plans to do during the 6 weeks of sprints after the midterm or describe your tentative solution and why it will work. This will help keep the assignment from looking like a collection of lists and make the last page look more complete.
